New products at Coupe Icare 2018

The new AGERA RS sees the introduction of the first EN-C glider to feature RAST!
We have combined RAST with an uncompromising performance profile. Through the synergies this produces, the AGERA RS is redefining the sport class and blurring the boundaries with the EN-D performance class.

Sizes S, SM as well as ML have successfully passed the testflights for certification already.
Delivery of the centre three sizes will start from beginning of October.
