## **Arcus 7 - now ready from size 22 to 30!**

There is hardly any glider which combines the attributes “classic” and “innovative” as naturally as the Arcus. It has been a regular at launch sites throughout the world for more than twelve years.

That’s no surprise, given that quality, safety and flying enjoyment characterise this beginner wing deluxe. It therefore goes without saying that a success story like that of the Arcus needs a new instalment.

Here it comes: the Arcus 7. A glider packed with innovations and the best part is that, unaccelerated, it’s certified EN A!
