## 200km+ record flights with the Mistral 7

**Team pilot Didi Siglbauer just got his Mistral 7 and immediately proved the wing's XC capabilities.**

In the beginning of June with the first 200km+ flight in the EN-B class launched from Germany. Last week he managed to top the performance again with a 213km FAI from the Alpstitze.

We are very proud and happy that the Mistral 7 now is the wing holding the biggest flights ever launched from Germany in the EN-B class.
