Mirage RS Plus

...change for the better!

The tried and tested basic concept remains unchanged. However, the canopy has been upgraded with a new, very lightweight 15 D-Tex fabric. This gives pilots a weight advantage and means a smaller pack size.

Enhancements have also been made to the riser for the Mirage RS Plus: The optimized trimmer system means even more precise adjustments to the angle of attack. The reworked riser geometry makes the Mirage RS Plus even easier to handle and ensures an intuitive connection to the canopy. As well as other design details, we have optimized trimmer use to allow fast and safe operation, even with thick gloves.

We are pleased to announce, that the Mirage RS Plus is available now at your local Swing Miniwing dealer!
