Spitfire 2 Plus

...show your colors!

A lightweight canopy is particularly advantageous for speed riding. That's why we've also used the high-quality and very lightweight 15 D-Tex fabric for the canopy of the Spitfire 2 Plus.

We also optimized operation of the reworked riser with new trimmer design and improved feel. All in all, these changes result in simplified handling for pilots and allow safe and rapid adjustment to the glide angle even with thick winter gloves.

The Spitfire 2 Plus comes in 3 new sporty designs and is available now at your local Swing Miniwing dealer!
