Stubai-Cup winner chooses ARCUS 7

Markus Schäfer receiving his new SWING ARCUS 7

Last weekend, march 8th to 10th 2013 the [22. Stubai-Cup](#) took place. Like it is typical in the Stubai valley, the weather absolutely differed from the prognosis and we could fly every day. More than 400 participants used the opportunity to testfly current wings and take part in the precision landing competition.

We from SWING also were present with our current models. Especially our basis intermediate wing ARCUS 7 was in great demand. Temporarily we were completely out of demo gliders and had to put off pilots until later. The feedback was thoroughly positive.

For the finale of the event, the winner of the Stubai-Cup was nominated and received his main prize. The lucky pilot, Markus Schäfer, could choose freely a category A or B paraglider among one of the 22 manufacturers present. His wing of choice was our ARCUS 7.

We congratulate the winner and wish him many wonderful flights with his new SWING paraglider.

A special thank is to be said to the organisational team. They again put up an all around succesful event.
