Swing Mistral 7 gains further successes

Our performance intermediate Mistral 7 continues to cause stirs in competitions. Last week, two further Mistral 7 pilots could celebrate excellent results.

Lloyd Willemsen flies since less than two years. He took part in the „Baberton Paragliding Comp“ in South Africa with his new Mistral 7. It was his first ever competition – and he instantly secured himself the victory in the EN-B class.

A sensational performance was also shown last Saturday by Goyo Gonzalez (Picture). The pilot of another Mistral 7 participated in the 5th round of the Spanish “Liga Centro de Parapente”. With his flight he left behind him all other pilots and secured himself the 1st place overall. This shows the enormous potential of performance the EN-B wing Mistral 7 bears. Even in direct comparison with higher classified paragliders.

SWING congratulates both pilots to their respective great performances.
